

# HTML/CSS course

Teens Programming School

## Assignment 6

---

### Goal:

Create fonts.html

There are 3 sections for this article:

1. Title
2. Content
3. Reference

### Specification:

1. For the title, the font is '**monospace**'; color is '**tomato**'; the font size is **3 times** of the default size; and the first letter has **shadow**.
2. For the content, the first line is **bold**; the text should be indented with **33px**; the font is '**sans-serif**'; the line height is **1.5 times** of the default height; the first word is all **uppercase** and its color is '**teal**';
3. For the reference, the font is '**italic**', has **1px spacing** between letters and has **underline**; aligning the text **to the right** of the page;

### Output:

 Javascript

**JAVASCRIPT** is a high-level, dynamic, untyped, and interpreted programming language. It has been standardized in the ECMAScript language specification. Alongside HTML and CSS, it is one of the three essential technologies of World Wide Web content production;
